If you do provide the information which is requested, the Renville County HRA/EDA will be able to determine your eligibility for Home Ownership & Rehab Program loan. If you do not provide the information, the HRA/EDA will not be able to determine your eligibility and you will not receive a loan.
3. You have the right to see, receive copies of, and challenge the accuracy and completeness of any and all information relating to you which the Renville County HRA/EDA has on file relating to your application.
4. To determine your eligibility for the Home Ownership & Rehab Program, or to deliver such assistance, such information relating to your application may be made available to: (a) staff of the Renville County HRA/EDA, (b) staff of another financial institution, and/or (c) a real estate professional who, with your permission, may be involved in the financing or transacting the rehabilitation or purchase of your home.

INSPECTION INFORMATION. While HRA/EDA staff may visit your home during the loan process to verify its general condition or that work has been completed, this visit does not constitute a formal inspection that warrants that the home is free of hazards or that the home or the improvements financed under the Home Ownership & Rehab Program meet the building codes of any unit of government.

WATCH OUT FOR LEAD POISONING! Please read carefully: If your house was constructed before 1978, it may contain lead-based paint. Lead-based paint is especially harmful to children under seven years of age. If lead-based paint is found in your home, steps may be taken to remove or cover the paint surfaces.

1. Children get lead poisoning when they eat bits of paint that contain lead. If a child eats enough lead paint, his/her brain will be damaged. He/she may develop learning disabilities or even die. Older houses often have layers of lead paint on the walls, ceilings, and woodwork. When the paint chips off or when the plaster breaks, there is real danger for babies and young children. Outdoors, lead paints and primers may have been used in many places, such as walls, porches and fire escapes. If you have seen your child putting pieces of paint or plaster in his mouth, you should take him to

a doctor, clinic, or hospital as soon as you can. In the beginning stages of lead poisoning, a child may not seem really sick. Do not wait for signs of poisoning.

2. Of course, a child might eat paint chips or chew on a painted railing or window sill while parents aren't around. Has your child seemed especially cranky? Is he/she eating very little? Does he/she throw up or have stomach aches often? These could be signs of lead poisoning. Take him/her to a doctor's office or to a clinic. A blood lead level screening test is advisable and available for children under seven years of age. Be sure to tell the rest of your family and people who babysit for you about the danger of lead.
3. There are proper and safe ways to remove or cover lead paint. Dry sanding or scraping are not safe lead paint removal procedures. If you have concerns about lead paint in your home, ask the staff of the HRA/EDA for more information concerning safe lead paint abatement procedures.
